

# JOINT STUDY PROGRAM – SECOND EDITION

University of Warmia and Mazury in Olsztyn (Poland) and  
University of Applied Sciences in Offenburg (Germany)

In spring 2010 the University of Warmia and Mazury in Olsztyn and the University of Applied Sciences in Offenburg taught, for the second time, a joint master's degree course in environmental biotechnology and engineering processes.

The first semester has just finished. Students took courses in biotechnological aspects of wastewater treatment and environmental protection. Now the students are preparing themselves for the second semester which will focus on engineering processes, and will be based at the Offenburg University.
