

JOINT STUDY PROGRAM – EIGHTH EDITION

University of Warmia and Mazury in Olsztyn (Poland) and
University of Applied Sciences in Offenburg (Germany)

In spring 2016 the University of Warmia and Mazury in Olsztyn and the University of Applied Sciences in Offenburg offered, for the seventh time, a joint master's degree course in process engineering, environmental protection and biotechnology.

The first semester has just finished. Students took courses in biotechnological aspects of wastewater treatment and protection. Now the students are preparing themselves for the second semester which will focus on engineering processes, and will be based at the Offenburg University.
